

ENERGY

We recognize energy is the backbone of the economy and that the field is rapidly changing. We help our clients deal with the changes by providing traditional legal services in areas such as energy marketing, compliance counseling, project development, project finance and public utility regulation.

Our clients include developers, investors, industrial energy consumers, oil companies, independent producers, utilities and government entities. We assist clients with advisory, regulatory, transactional and litigation matters with the following industry segments:

- Alternative Energy & Green Technology
 - Solar Energy
 - Wind Power
 - Geothermal Energy
 - Climate Change
 - Hydroelectric Development, Relicensing and Compliance
- Natural Gas Storage and Liquefied Natural Gas Projects
- Electric Power Generation, Distribution, Marketing, Smart Grids and Transmission
- Oil and Gas – Production and Transmission
- Coal Fired Generation
- Telecommunications-Related Services

We take a proactive approach by assembling our team from various practice areas to provide a full range of service offerings. The skills and resources used in the Energy Industry require a diverse base of attorneys. We've compiled a group of interdisciplinary teams that meld the skills of lawyers from our Corporate and Financial
