MVA ENVIRONMENTAL CONSULTANT LAUNCHES ELECTRONIC

Nature Notes, a new email natural history column authored by Dr. Bob Thomas, senior environmental advisor to Moore & Van Allen's Government Policy and Regulatory Affairs (GPRA) Group, launched earlier this month.

Dr. Thomas, director of Loyola University New Orleans' Center for Environmental Communication, focuses each newsletter on the fauna and flora of coastal Louisiana, an area known to Louisiana's coastal residents as America's WETLAND.

Dr. Thomas has written previous nature columns, most recently for *Delta Journal* in the New Orleans's *Times-Picayune*. *Nature Notes* is a continuation of that publication.

Nature Notes will be archived on Dr. Thomas's website (www.loyno.edu/lucec) by the end of August. If you would like copies of prior issues, then simply send him an email request.

If you would like to subscribe, to *Nature Notes*, send an email to Dr. Thomas at rathomas@loyno.edu. Dr. Thomas solicits your comments and suggestions for topics of interest.
