

SEONGUN "MATT" HONG

Associate, Intellectual Property

t 704.331.3555

matthong@mvalaw.com

As a licensed patent attorney, Matt Hong concentrates his practice in intellectual property, patent and trademark matters with a focus on patent prosecution.

With an educational background in chemistry, Matt concentrates his practice in intellectual property matters with a focus on patent prosecution and intellectual property diligence and transactions.

Before practicing law, Matt worked as a research specialist in a laboratory at the Emory University School of Medicine that focused on exploring molecular pathways through kidney protein expression. Matt's educational background and research experience make him well-versed in the chemical and biological sciences.

Matt graduated, with honors, from the Emory University School of Law, where he served as an online editor on the Emory Law Journal. During law school, Matt worked as an extern in the global patents group of a Fortune 100 company, gaining valuable experience with freedom-to-operate opinions and foreign patent laws in the computer software and chemical arts. He also completed Georgia Tech's TI:GER (Technological Innovation: Generating Economic Results) program, where he conducted intellectual property and commercialization research for medical device and wireless technology startups.

Technical Experience

- Distributed ledger technology
- Artificial intelligence and machine learning
- Medical devices
- Data security and cryptography
- Raman spectroscopy

Capabilities

Intellectual Property

Patent

Education

J.D., Emory University, Online Editor, Emory Law Journal

B.S., Chemistry, University of Connecticut

Admissions

North Carolina

Georgia
