*Benchmark Litigation*, considered to be a definitive guide to America’s leading litigation firms and attorneys, is the only publication that focuses exclusively on U.S. litigation. Since the brand’s inception in 2008, the *Benchmark* line of publications has grown to also include coverage of the Canadian and Mexican litigation markets. The publication’s rankings and editorials stem from the culmination of a six-month research period during which researchers conduct extensive interviews with litigators and their clients to identify leading litigators and firms. During these interviews, researchers examine recent casework handled by law firms and ask individual litigators to offer their professional opinions on peers.
