Taylor Published by Corporate Counsel

09.2012

Charlotte Commercial & Technology Transactions Senior Counsel Todd Taylor was published by *Corporate Counsel* on September 17. Taylor's article, "An Analysis of Proposed Federal Cybersecurity Legislation," was included in the publication's "From the Experts" section, and discusses the bills recently introduced in Congress to address the prospect of cyber threats and their impact on our nation's security.

Taylor quotes Michael Chertoff, former head of the U.S. Department of Homeland Security, who stated that cyber threats represent one of the biggest challenges to national security since the nuclear age began.

Taylor summarizes the Cyber Intelligence Sharing and Protection Act (CISPA), the Strengthening and Enhancing Cybersecurity by Using Research, Education, Information, and Technology Act of 2012 (the SECURE IT Act), and the Cybersecurity Act of 2012 (CSA).

"Cybersecurity is a dynamic field. Companies must be flexible as they manage both cyber threats and new laws and regulations that are likely to be enacted in response to cyber threats," he stated.
