## Lee Provides Insight on Cloud Computing

*TechRepublic*

03.2013

Charlotte Corporate Member Marcus Lee was quoted in *TechRepublic's* March 5 article "Legal issues to consider with cloud computing." The piece addresses the legal details IT leaders should take into consideration when going to the cloud.

"Even if you have a great contract with the cloud provider with all the right protections, it is still very important for the company to do a thorough due diligence on the cloud provider to be sure it is adequately secured and has appropriate backup capabilities," Lee stated.
